

TEAM BUILDING

Bespoke experiences aligned with your goals.

From motivating teams to rewarding performances and fostering collaboration, we create activities customised to your group's needs and schedule.

Casino Party

The activity includes gaming tables hosted by entertainers, where guests can test their luck and skill. The games are simple yet exciting: players collect chips and exchange them for raffle tickets to win prizes.

Creative Painting

A hands-on activity on large canvases where participants let their imagination run free and paint together, using brushes, sponges, rollers, and spray paints. This activity is designed to foster creativity, social interaction, a sense of belonging, and teamwork.

Wine Tasting

A sensory experience where participants, guided by experts and technical sheets, must identify and present the wine assigned to their team.

The Big Quiz

A fun team activity where participants play a live quiz using their smartphones. Rankings are calculated in real time using accuracy and response time metrics.

Guest Speaker

We offer a wide selection of guest speakers from diverse backgrounds and with varied experience, who know how to motivate, engage, and impress any audience across all sectors, making any event truly unique. Speakers include sports personalities, journalists, actors, managers, entrepreneurs, experts, celebrities, and pundits.

Murder Mystery Dinner

A unique form of entertainment: during dinner, guests investigate a crime. As the interrogation unfolds, clues are distributed to help each investigation team piece together the evidence and solve the mystery, ultimately identifying the culprit.

Drum Circle

An energetic team session where participants play percussion under the guidance of musicians/instructors, building rhythms together and finishing with a high-energy ensemble performance.

Cooking Experience

A cooking class that turns into a creative, fun-filled challenge. Participants split into teams and must work together to reach a shared goal: making different types of fresh pasta (MasterChef style). The chef then tastes the results from the top three teams and declares the winner.

LEGO® Serious Play

An innovative, hands-on workshop that uses LEGO® bricks to improve organisational skills and encourage collaborative decision-making for faster problem-solving.

Cluedo-style Dinner

A dinner-time whodunit: between courses, teams uncover clues that build leads toward the culprit. The more clues they crack, the closer they get to the truth.

Cocktail Challenge

Teams of 6–9 participants compete to create the best alcoholic and non-alcoholic cocktails. Professional bartenders teach techniques and serve as the judging panel to pick the winning team.

Showtime

A live performance – comedy, mentalism, magic, or music – to lift spirits after a long day of meetings. Perfect for engaging a broad audience and making your event truly memorable.

Happy Hour Escape Box

A chilled crate, locked by riddles: drinks, snacks, and all the tools for a perfect aperitif wait inside. Teams are drawn into a playful showdown between the Party Poopers and the Aperitif Liberation Front. They need to solve puzzles and unlock compartments to uncover the aperitif piece by piece before time runs out. A lively, puzzle-driven team-bonding experience that blends problem-solving with the pleasure of a quality aperitif.

Achilles' Heel

Teams analyse clues and police evidence to unmask the killer before time runs out. A simulated “murder case” is supplied in a briefcase containing clues, puzzles, police reports, and items to examine. Tasks include opening a lockbox, reviewing confidential documents, examining the victim’s wallet and mobile phone, accessing designated websites, and listening to recorded messages. Objective: solve the case before it’s closed for good.

The Legendary Challenge

The city has been plunged into darkness by an unknown group of hackers. Unbeknownst to the public, the emergency power system still runs – but it needs restarting. Teams have two hours (flexible) to track down the secret emergency generator, stop the hackers, and restore power before disaster strikes.

Treasure Hunters

Ahoy, matey! Participants join rag-tag crews on the hunt for Captain Kidd's lost treasure. They have to overcome obstacles, solve a series of puzzles, decipher pirate codes, and crack decrypted videos and quizzes to recover missing pieces of an ancient map. Some challenges include Augmented Reality elements. Teamwork, cunning, and strategy will determine who finds the hidden loot. All hands hoay, mateys!

Christmas Adventures

The elves need help – Santa's workshop is frozen! The heating system has failed, and teams must recreate the lost magic formula to brew the "legendary potion" and restore order. They'll have to solve puzzles, uncover "magical" documents, decrypt videos and quizzes – with some challenges including Augmented Reality – and use a kit of props to complete hands-on tests. Teamwork is essential to bring the workshop back to life.

Thrilling Day

An immersive murder-investigation experience designed to push participants beyond their comfort zones and sharpen problem-solving skills. Teams question suspects, examine evidence, collaborate with allies, and piece together clues to unmask the culprit. The activity can be staged indoors or outdoors along a routed course, with actors positioned at each stop. Special features include a crime scene, witness statements, and a will.

Action Painting

Teams get hands-on with paint to create an original canvas that expresses how they see the company, its values, and the strength of the group. The blank canvas becomes a communal stage for ideas, feelings, and personal voices, allowing both group and individual identities to emerge. Bursting with colour and energy, this hands-on activity fosters communication, collaboration, and creativity.

Bar Challenge

Each team opens a pop-up bar and serves two signature drinks – a cocktail and a mocktail. Basic ingredients (spirits, fruit juices, etc.) and bar tools (a shaker, a Boston shaker, knives, straws, etc.) are provided, and teams receive credits to purchase additional supplies. Entries are judged on quality, creativity, teamwork, and resource management. The overall score will determine the winning team.

Sound Building

An engaging, rhythmic team-building experience where participants play drums and percussion under the guidance of a facilitator who uses simple techniques to get everyone in the groove. Together they explore patterns and dynamics, gradually forming a full-fledged ensemble. It's a hands-on way to strengthen the team's unity, leaving participants with a sense of belonging – all in an energising, joyful atmosphere.

Level Up

A time-limited competition combining quiz and video/photographic tasks, designed to maximise team scoring under pressure. Teams progress through a series of levels; both difficulty and point values increase at each stage, with harder challenges bringing bigger rewards. Teams that reach higher levels before the clock stops can access engaging bonus challenges for additional points.

Sailing

Ideal to sharpen teamwork, sailing is a perfect living metaphor: accompanied by expert instructors, participants must make quick decisions, coordinate closely, handle unexpected situations, overcome hesitations, and take on new challenges.

Rafting

Rafting is both an exhilarating adventure and a thrilling sport. Participants descend rivers and rapids for an adrenaline rush while fully enjoying the surrounding nature. Success depends on coordination, concentration, and a strong focus on the objective as teams paddle together in an inflatable raft.

The Big Game

Teams receive a map and work through a series of clues that lead them from one point to the next. At every checkpoint, a judge sets a task; completion earns the team an item. Once all tasks are complete, teams combine their collected items to reveal a final puzzle.

Corporate Olympics

An inclusive, fun-filled team competition for all fitness levels. Split into teams, participants tackle a mix of sporting, entertainment, and creative challenges to earn points and win.

Spy Game

Split into teams, participants act as secret agents and undertake a series of missions designed to test their skills and cunning. The end goal? Crack an intricate espionage case.

Hike Plus

An outdoor activity that turns a scenic Lake Garda hike into an adventure. Along the route, teams face a variety of on-the-move challenges.

Geocaching

Teams use GPS devices and the provided coordinates to locate and photograph specific points. The objective is to recreate the reference photos supplied at the start as accurately and as quickly as possible.

Orienteering

A timed race where participants use a map and a compass to go from one checkpoint to the next and reach the finish line as quickly as possible.

City Express

Inspired by the TV format, City Express puts teams through a series of city-wide tasks to earn points and climb the leaderboard. There are three types of challenges to face around town, and players can involve passers-by in bonus tasks to boost their score.

Treasure Hunt

A map- and road-book-led adventure: participants follow clues, solve puzzles, and complete challenges to find the hidden treasure. Which team will claim the prize?

Director for a Day

A hands-on filmmaking experience to foster relationships and a sense of belonging. Guided by professionals, participants write, cast, shoot, and direct a short film, with a themed awards ceremony to conclude the experience.

28 Challenges

A fast-paced, fun, and entertaining team competition made up of physical and mental challenges. The activity places the team centre-stage – everyone's talent and contribution matter.

Thrilling Day

An immersive murder-investigation experience designed to push participants beyond their comfort zones and sharpen problem-solving skills. Teams question suspects, examine evidence, collaborate with allies, and piece together clues to unmask the culprit. The activity can be staged indoors or outdoors along a routed course, with actors positioned at each stop. Special features include a crime scene, witness statements, and a will.

City Explorer

Armed with tablets (or smartphones) and our app, teams navigate to hotspots across the city centre to unlock and complete challenges. The app awards points for each successfully completed task; the team with the highest score within the time limit wins. Challenges include riddles, quizzes, photo/video tasks and, in some cases, Augmented Reality.

San Nicolò

1925 - 2025

Aperitivo Cruise

Lake Garda sailing cruise with aperitif on board

Splash & Fruit Cruise

Lake Garda sailing cruise with fresh fruit and a swim stop

Sunset Cruise

Lake Garda sunset cruise with a glass of wine
